Profile

I'm Sam, a software engineer based in London.

I'm a strong communicator and passionate about delivering quality in products. I have broad industry experience across a range of types of organisations - including finance, gaming & advertising. I'm an expert on code quality and spend time interacting with the open source community across a range of projects.

What sets me apart? My critical thinking and communication skills.

I have worked accross the stack with various technologies and have a particular interest in all things JavaScript.

Commercial

I have been in the industry since 2011 after graduating from the University of Plymouth in Web Applications Development. Since then, I've been working across various sectors including advertising, ed-tech, startups & sports betting.

- React JavaScript Developer (contract) at Reason (for AlixPartners) - 07/18 - Present
